IT & AI Specialist

Computer Engineering Graduate

MSc AI & Data Science Student

AI Portfolio: <https://b3d012.github.io/>

About Me

Computer Engineering graduate and current MSc AI & Data Science student with hands-on experience in applied machine learning, computer vision, data preprocessing, model evaluation, IT support, and customer-facing operations. Experienced in building academic and personal AI projects involving CNNs, ML pipelines, image classification, data analysis, and automation-style workflows. Strong background in troubleshooting, technical support, user communication, staff training, and process improvement. Interested in AI engineering, AI automation, data science, computer vision, and enterprise AI adoption.

AI & Data Projects

CholecTrack20 Computer Vision Project

- Worked with the CholecTrack20 surgical video dataset for computer vision and object detection tasks.
- Prepared dataset structure for YOLO-style training and experimented with detection/tracking workflows.
- Gained experience with image/video data preparation, model training setup, dataset formatting, and evaluation logic.
- Developed stronger understanding of real-world AI pipelines involving healthcare-related visual data.

Skin Condition Classifier

- Built an image classification project for skin condition detection using machine learning and deep learning methods.
- Worked with image preprocessing, dataset organization, model training, and evaluation.
- Explored CNN-based classification for categories such as benign, malignant, acne, and ringworm.
- Focused on improving model performance while keeping the system understandable and usable.

Machine Learning & Data Science Pipelines

- Developed ML pipelines for classification and regression tasks using Python, Scikit-Learn, Pandas, and NumPy.
- Applied data cleaning, feature scaling, preprocessing, train/test splitting, and model evaluation.
- Worked with supervised learning models including KNN, decision trees, ridge regression, neural networks, and CNNs.
- Evaluated models using metrics such as accuracy, precision, recall, RMSE, and confusion matrices.

Network Traffic & Security Analysis Project

- Worked on packet capture and network traffic analysis using tools such as Wireshark, Scapy, and Npcap.
- Collected and analyzed TCP/UDP/IP traffic for network monitoring and security-related use cases.
- Built experience connecting data collection, preprocessing, and analysis into an AI/security workflow.

League of Legends Matchmaking Fairness Analysis

- Analyzed ranked match data to study matchmaking fairness, rank variance, and player role patterns.
- Used data analysis methods to compare match balance and identify trends across large match datasets.
- Strengthened practical experience in research-based data analysis, fairness evaluation, and statistical thinking.

AI & IT EXPERIENCE

SEHA STMC – IT Operations / IT Support Team (11/2024 – 04/2025)

- Provided first-line IT support for hospital staff and internal systems.
- Troubleshoot hardware, software, and network issues in a healthcare IT environment.
- Logged, tracked, and followed up on incidents using internal ticketing tools.
- Supported users in a fast-paced environment requiring clear communication, accuracy, and reliability.
- Built practical experience with enterprise IT operations, user support, and technical problem solving.

Lush Fresh Handmade Cosmetics – Retail Supervisor / Trainee Manager (8/2022 – Current)

- Supervised daily retail operations and supported a team of sales staff.
- Trained new employees on systems, procedures, customer service, and daily workflows.
- Monitored KPIs such as conversion rate and average sale value to support store performance.
- Communicated with management to improve customer engagement and daily operations.
- Developed leadership, client-facing communication, training, and problem-solving skills useful for AI adoption and consulting roles.

AI & Technical Skillset

Artificial Intelligence & Machine Learning

- Supervised Learning: classification, regression, KNN, decision trees, ridge regression, neural networks, CNNs
- Computer Vision: image classification, object detection preparation, dataset formatting, model evaluation
- Data Science: data cleaning, preprocessing, feature scaling, exploratory data analysis, model comparison
- Evaluation: accuracy, precision, recall, confusion matrices, RMSE, validation/testing workflows

Tools & Libraries

- Python, Scikit-Learn, Pandas, NumPy
- TensorFlow/Keras basics
- YOLO-style computer vision workflows
- Wireshark, Scapy, Npcap
- VS Code, Conda, Jupyter Notebook

AI & Automation Interests

- AI agents, workflow automation, chatbots, RAG, business AI use cases, CRM automation, and applied AI systems

IT Operations & Support

- Windows support, MS Office support, hardware/software troubleshooting, ticketing systems, POS systems, LAN/Wi-Fi troubleshooting, medical IT systems

EDUCATION

American University in the Emirates | Dubai, UAE
Masters in AI & Data Centers

08/2025 – Current

Abu Dhabi University | Al Ain, UAE
Bachelors in Computer Engineering

08/2020 – 12/2024

Al Dhafra Private School | Al Ain, UAE
High School Diploma

08/2006 – 06/ 2020

Other Professional Experience

Qatar Alnada Health Care – Medical IT Assistant (01/2022 – 03/2022)

- Assisted in maintaining IT systems for healthcare staff
- Supported Covid-19 relief technology setup

Skechers – POS Technician (05/2021 – 10/2021)

- Maintained and configured point-of-sale systems
- Provided onsite support for retail IT systems

Abu Dhabi University – Front Desk (06/2022 – 08/2023)

- Assisted students and visitors with administrative inquiries
- Handled database entries and updated student records
- Provided first-line troubleshooting for student portal and IT kiosks
- Delivered professional front-line support in a fast-paced environment

Arabian Canadian Medical Center – Patients Records Management (06/2022 – 08/2022)

- Digitized and managed sensitive patient records securely
- Worked with healthcare IT systems to ensure data accuracy
- Supported staff in accessing and retrieving medical records efficiently
- Maintained confidentiality and compliance with medical data policies

The Vapors Warehouse – Sales Ambassador (01/2021 – 05/2021)

- Assisted customers with product selection and purchases
- Operated POS systems and handled transactions accurately
- Supported small-scale IT troubleshooting for POS devices and shop systems
- Contributed to achieving sales targets through effective customer service
